JP Salomeo

Software Engineer

jasalomeo@up.edu.ph github.com/ysxiaixsy linkedin.com/in/jp-salomeo

SUMMARY

Third-year BS Computer Science student at the University of the Philippines Visayas and DOST-SEI merit scholar. A software engineer who builds web apps, games and language tooling end to end, from database rules and server logic to the interface, and designs the UI people use. Before UP, spent two years on a three-person research project at Philippine Science High School identifying endophytic fungi with pharmaceutical potential.

EDUCATION & INVOLVEMENT

University of the Philippines Visayas 2024 – Present

BS Computer Science

- Publications Committee, Komsai.org (2024–2025, 2026–2027)
- Publications Committee, UPV Elektrons (2026–2027)
- Arts Committee, UPV Elektrons (2024–2025)
- Website Development Committee, PAGBUTLAK (2026–2027)

Philippine Science High School – Western Visayas Campus 2022 – 2024

Senior High School

- Branding Committee, SineSci (Cinematograpisay)
- Publications Committee, Project Aklatan: Second Story
- Layout and photo editing, Batch 2024 Yearbook Committee

PROJECTS

SACKTO · sackto.vercel.app 2026

Brand, UI/UX design & development · Hack Iloilo 2026

Post-harvest capacity planning for the Iloilo Rice Processing Complex, with an SMS channel for farmers and buyers.

Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Vercel AI SDK, Python, Vercel

RateUPV · rateupv.vercel.app 2026

Lead, UI/UX design & full-stack development · CMSC 126 final project

Student-driven reviews of UP Visayas campus facilities and services, like Rate My Professors for the places around campus.

Next.js, TypeScript, Tailwind CSS, shadcn/ui, Supabase, PostgreSQL, Vitest, Playwright, Vercel

Tavern Card Game · github.com/ysxiaixsy/Tavern-Card-Game 2026

Solo developer

A mobile recreation of Gwent, the card game from The Witcher 3, with AI opponents and online play.

Expo, React Native, TypeScript, Zustand, Supabase, PostgreSQL, Vitest

SolNexus · github.com/CMSC128-NexusWorks/SolNexus 2026 – Present

Full-stack development, lead UI/UX design & Scrum Master · CMSC 128/129, for a real client

A lead and client communication pipeline for SolTech EMR that gathers lead conversations into one searchable system and shows which leads need a follow-up today.

React, Vite, TypeScript, Tailwind CSS, shadcn/ui, FastAPI, PostgreSQL, dbt, Apache Airflow, Docker

OnLine · github.com/ed-cambel/cmsc127-final-project/tree/jp 2026

UI design · CMSC 127 final project

A queue management system for UP Visayas service offices: students join and track queues, staff call the next person, and admins manage services.

PHP, MySQL, JavaScript, HTML, CSS

TrapScript · github.com/ysxiaixsy/cmsc-124-rust 2026 – Present

Co-creator · CMSC 124

A dynamically typed scripting language and its tree-walking interpreter, written from scratch in Rust.

Rust

Nadumduman · ysxiaixsy.github.io/Nadumduman-1.0-web 2026

Development · School project

A visual novel set in Leganes, Iloilo. The title is Hiligaynon for “remembered.”

Ren'Py, Python

SKILLS

Languages	TypeScript, JavaScript, Python, Rust, C, Java, Dart, PHP, Ren'Py, HTML5, CSS
Frameworks	React, React Native, Next.js, Node.js, Expo, Flutter, FastAPI, Tailwind CSS, shadcn/ui, Material UI
Data & platforms	PostgreSQL, MySQL, Supabase, Firebase, Vercel
Design	Figma, Adobe Illustrator, Adobe Photoshop
Tools	Git, Docker, Vite, Vitest, Claude Code, Codex
